ACTIVITY BOOK FOR CHILDREN (3-4 YEARS)

**Ministry of Women and Child Development
Government of India
New Delhi**

SEPTEMBER, 2017

What is this activity books all about?

This is a prototype of an activity book which can be used as a guide while developing state specific activity books for 3- 4 year old children. This prototype includes worksheets which support the development of fine motor, creative and cognitive skills for young children. This activity book covers the progression of concepts and skills that are age and developmentally appropriate.

Adaptation guidelines

- 1) States should align this activity book with the state ECE curriculum.
- 2) Activities should be planned to reinforce spiral and graded learning while catering to all domains and skills.
- 3) Contextually relevant pictures, letters and words may be added during adaptation.
- 4) Incorporating themes in every activity sheet is not necessary.
- 5) The Anganwadi Worker should be given orientation during training on the content of the activity book and how it can be used in the classroom to foster children's learning and development needs, not as a substitute for but as a supplement to other interactive group and individual activities.
- 6) The assessment cards should be linked with the activity book so that Anganwadi Worker can observe some related indicators and use the child's output for assessment, in addition to other forms of assessment.

Do's and Don'ts in use of activity books (For Anganwadi Worker)

- 1) Please note that activity book should not be seen as a replacement of classroom processes, but only as a means to reinforce concepts. Children learn concepts and vocabulary through a process of first engaging with the environment, with objects, with other persons and with materials through concrete activities and experiences. Then only can they transfer that learning to the next level by engaging with symbolic representation of these objects/experiences through pictures and symbols, for which activity books are helpful.
- 2) Be flexible and conduct a given activity according to the child's needs and pace of learning.
- 3) Please don't force young children to complete the worksheet neatly or within a stipulated time. Allow them to do their best in their own preferred way, since each child has different interests and abilities.
- 4) It is advised not to use activity books every day. Two worksheets per week are enough to engage young children.
- 5) Talk about the worksheet first and give clear instructions to children.
- 6) Please show the activity books to parents which will help them gain an understanding of an age appropriate program as well as insights on their child's progress.
- 7) Do not grade children or allocate marks since the child should not feel that they are being tested while working on the activity book.
